CAI_SIMPLICITY
v. 20130526
Author: CAI (Alex I. Chebykin)

Used:
Analog clock
Author: ramzport

Weather underground ICAL

Initial setup

Weather

Go to http://www.wunderground.com/

Type in your town in the search field and press enter. If your home town is found, you will be directed to a page with its forecast.

Notice the blue arrow button on the topish right of the page (next to the facebook, twitter and rss buttons): go over it and some options are revealed. Go to Download ICAL option.

Put your mouse on top of it, right click and copy link address - save it somewhere.

Navigate inside the folder and make the script executable:
Either by right clicking it or by chmod +x ~/.conky/conky_wunderground2/wunderground_script

Open the script with your favourite text editor and replace my location's address at the wget command with yours.

Customization

There are 2 wallpapers in this distribution. Default settings is for **Aluminium 1280x800.jpg**.

If You want to use **Aluminium 2 1280x800.jpg**, change settings:

in **~/.conky/cai_simplicity/weather/.conkyrc**:

from

For Aluminium 2 1280x800.jpg

#${voffset 145}

For Aluminium 1280x800.jpg

${voffset 345}

to

For Aluminium 2 1280x800.jpg

${voffset 145}

For Aluminium 1280x800.jpg

#${voffset 345}

in **~/.conky/cai_simplicity/calendar/.conkyrc**:
from

      # For Aluminium 2 1280x800.jpg
      #${voffset 105}
      # For Aluminium 1280x800.jpg
      ${voffset 40}

to

      # For Aluminium 2 1280x800.jpg
      ${voffset 105}
      # For Aluminium 1280x800.jpg
      #${voffset 40}

and
from

      # For Aluminium 2 1280x800.jpg
      #${voffset 425}
      # For Aluminium 1280x800.jpg
      ${voffset 575}
      ${alignr 50}${font ubuntu:size=8}${color2}powered by ${color3}${voffset -8}${font Arial Black:size=12}openSUSE

to

      # For Aluminium 2 1280x800.jpg
      ${voffset 425}
      # For Aluminium 1280x800.jpg
      #${voffset 575}
      ${alignr 50}${font ubuntu:size=8}${color2}powered by ${color3}${voffset -8}${font Arial Black:size=12}openSUSE

      If You don't need calendar or weather forecast, just remove from ~/.conky/cai_simplicity/startup lines:
conky -c ~/.conky/cai_simplicity/weather/.conkyrc & - for weather
conky -c ~/.conky/cai_simplicity/calendar/.conkyrc & - for calendar with forecast

Wallpaper

      Wallpapers is in ~/.conky/wallpaper/

Different distro

      You can change distro name in file ~/.conky/cai_simplicity/calendar/.conkyrc, just go to last string and change openSUSE to whatever You want:
${alignr 50}${font ubuntu:size=8}${color2}powered by ${color3}${voffset -8}${font Arial Black:size=12}openSUSE

Running

      Start ~/.conky/cai_simplicity/startup
